Education

United Arab Emirates University.   Al Ain, UAE
Bachelor's of Statistics & Data Analytics   2023 - Current

Rashid Bin Saeed Islamic Institute   Dubai, UAE
High School Degree in General STEM with a score of 97.38%   2023

Experience

Freelance   Remote
Developer   *Jan 2020 – Current*

- Develop and customize code solutions for clients based on their specific needs and requirements.

- Maintain regular communication with clients, ensuring all project details and specifications are accurately understood and implemented.

- Write clean, efficient, and bug-free code to deliver high-quality software solutions.

- Collaborate with clients to troubleshoot and resolve any technical issues or challenges that arise.

- Continuously update skills and stay abreast of industry trends and advancements to provide cutting-edge solutions.

- Deliver projects within agreed-upon timelines, ensuring client satisfaction with the final product.

Contract - Confidential   Hybrid
Artificial Intelligence Engineer   *Aug 2024 – May 2025*

- Developed and implemented a custom AI integration module for EEPM software to automate data extraction and reporting.

- Designed and deployed an automated reporting system generating daily reports using predefined KPIs and templates.

- Conducted full-cycle project delivery: planning, development, testing, deployment, and post-deployment support.

- Authored comprehensive technical documentation and user manuals to enhance usability and knowledge sharing.

- Managed risk mitigation strategies to ensure system accuracy, integration performance, and availability.

Freelance   Remote
Voice Actor   *Jan 2020 – May 2024*

- Establish effective communication with clients to understand their voiceover needs and requirements.

- Provide high-quality voice recordings that meet or exceed client expectations.

- Adapt voice performance to accurately reflect the desired tone, emotion, and style for each project.

- Incorporate feedback and make necessary revisions to deliver the best possible end product

- Maintain professionalism, reliability, and prompt communication throughout the voiceover process.

MetaBlix   Remote
Staff Management   *Mar 2022– December 2022*

- Managed staff relations, fostering positive working relationships and addressing any issues that arose.

- Created comprehensive guidelines for staff members to follow, ensuring consistent practices and standards.

- Oversaw the company's approach to handling relations with the development department, fostering effective collaboration and communication.

- Organized and managed events, ensuring smooth execution and high levels of participant satisfaction.

- Developed and implemented server rules to maintain a fair and enjoyable environment for players.

- Effectively managed player interactions and addressed any concerns or disputes that arose.

MetaBlix   Remote
Developer   *Mar 2022– December 2022*

- Developed and maintained the server, focusing on creating a seamless and immersive experience for players.

- Wrote efficient code, optimizing server functionality and minimizing resource usage.

- Implemented and managed the server's database, ensuring data integrity and efficient retrieval and storage.

- Prioritized clean and organized code structure, making it easier for other developers to understand and collaborate.

- Proactively identified and resolved bugs and issues to provide a smooth and error-free gameplay experience.

- Continuously optimized code performance to enhance server responsiveness and reduce latency for players.

Projects

AI Solution for Transcription and Translation
Personal Project *May 2024 – June 2024*

- Created an AI solution for real-time transcription and translation using multiple advanced technologies.
- Ensured high-speed processing and accuracy for various languages.
- Improved efficiency in content creation and communication for users.

AI Model for Customer Support
Personal Project *Feb 2023 – June 2023*

- Developed an AI model designed for customer support that understands different dialects of Arabic.
- Implemented multi-language support to cater to a diverse user base.
- Enhanced user satisfaction by providing accurate and context-aware responses.

Personal Portfolio Website
Personal Project *Mar 2022*

- Developed a personal portfolio website simulating a Linux console using React and Node.js.
- Showcased coding skills and project experience in an interactive and unique manner.
- Enhanced user engagement with a creative and functional design.

Chess Engine
Personal Project *Dec 2021*

- Created a fully functional chess engine using Python.
- Implemented complex algorithms for game strategy and AI opponent functionality.
- Provided a challenging and enjoyable experience for users.

Discord Bots
Personal Project *May 2021*

- Developed multiple Discord bots with various functionalities using Python.
- Automated tasks and provided entertainment and utilities for Discord communities.
- Ensured reliable performance and user-friendly interactions.

Skills & Interests

Technical Skills

Programming Languages: Python, JavaScript, HTML, CSS, and more.

Development: Full-stack development, Web development, AI and machine learning.

Tools & Technologies: React, Node.js, Git, Docker, REST APIs.

Languages: English (Fluent), Arabic (Fluent).

Interests

Technology & Programming: Passionate about staying up-to-date with the latest advancements and trends in technology and software development.

AI & Machine Learning: Interested in developing and implementing AI solutions to solve real-world problems.

Open Source Contribution: Active participation in open-source projects and communities.

Gaming: Developing game engines and bots, and exploring game design principles.

Continuous Learning: Enthusiastic about expanding knowledge through courses, books, and hands-on projects.
